

# What does black tenting entail?

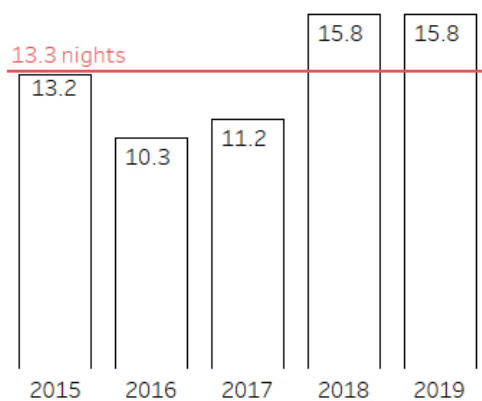

Over a span of **36 days**,  
the average black tenter

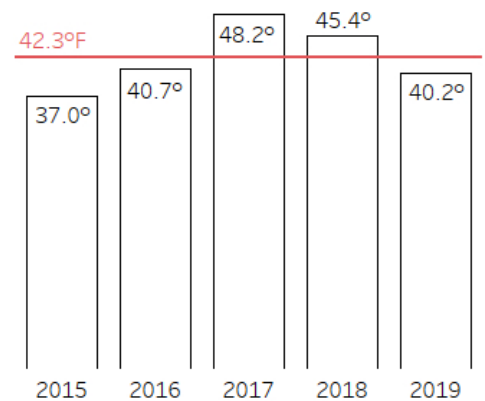

spends **103 hours**

and **13 nights** in  
Krzyzewskiville

at an average  
temperature of **42°F**.

Created in Tableau by Ethan Holland using the Dark Sky weather API and data considerably given by the Head Line Monitors.  
The average temperature is weighted by the number of people in the tent.
